

[BYNATURE]

Enjoy. Breathe. Feel good.

ByNature

SPECIALISTS IN BIOPHILIC DESIGN

We create strong connections between nature and the indoor environment.

BYNATURE VISION

Nature plays an essential role in our lives by improving our wellness, happiness, health, and even our productivity. Yet, while we spend 85% of our time indoors, there is still an increasing lack of nature in our living & work spaces.

ByNature believes that any indoor space can be transformed into a healthy living environment. We aspire to bring nature into everyone's lives by creating an experience for people to enjoy, breathe, and feel good.

BYNATURE MISSIONS

ByNature's team of passionate people are dedicated to using their knowledge of biophilic design principles to enliven your home or office space with nature.

ByNature's vision, however, could not happen without its growing network of visionary partners (architects, designers, landscapers, engineers, and creative visionaries alike). Together, we bring our unique expertise to the table to promote, educate and innovate by creating and sourcing new leading-edge technologies that make your space a better place.

PRESERVED

Our plants and mosses are preserved in an innovative and eco-friendly way using 100% natural oils and food dye. This allows the plants to maintain their authenticity without the need for maintenance.

WHAT IS A PRESERVED?

Mossart and Folia creations are made with 100% natural mosses, flowers and plants that require no watering, natural light, nor trimming.

Cultivated or harvested according to ecological practices, the mosses, plants and flowers are no longer living and require little to no maintenance. They are preserved without the use of chemicals by using both a natural oil and natural food dyes. As the oil mimics the water in the plant, they still appear live and can maintain a natural appearance for months or years to come (6 months to 5-10 years for plants/flowers and 8+ years for the preserved mosses; please refer to life expectancy of individual plants).

HOW TO MAINTAIN PRESERVED MOSSART OR FOLIA PIECES?

Preserved products are for indoor-use applications only and their softness may vary according to the relative humidity of the room. In the case of a very dry environment (below 30% humidity), the REINDEER moss or plants may become dry or harden. Once returned to normal room temperature and humidity levels, however, it may become soft again. This variation is usually related to the season. A relative humidity considered as "normal" is between 45 and 65%.

Be aware that the "softness state" of the plant does not change its look. Once returned to normal room temperature and humidity levels, however, the reindeer moss will become soft again. When near end of life expectancy, preserved plants and flowers may begin to dry and as a result change form. Replanting or touch-ups may be requested at this stage. Never water or spray preserved products and avoid keeping them in direct sunlight for prolonged periods. This will help ensure the preserved products reach their longest life expectancy and maintain their colour, shape and texture.

IMPORTANT NOTES

You may experience a natural scent for a few months, which will progressively fade. If required, the moss may be carefully dusted using a blow dryer on a low temperature setting.

Preserved products are natural and will usually have some varieties in colour.

MOSSART

Our Mossart creations are 100% natural and made with preserved moss.
Mossart products are no longer living and do not require any natural
light, trimming, or watering.

Most popular patterns

DOMES

Domes are lightweight circles that are easily mounted to a wall to assist with sound absorption in a room. They add a unique decor element to any room and can be created in any of our Reindeer Moss colours for your perfect fit.

Dome Sizing Options (Diameter)

(12") (18") (24")

4" - 5"

Custom sizes available upon request

SPHERES

Spheres are lightweight moss balls with sound dampening properties that are designed to be suspended from the ceiling. They are made from Reindeer Moss and can be ordered in any of the colours we stock.

Sphere Sizing Options (Diameter)
(3") (6") (8") (12") (16") (24") (30")

Custom sizes available upon request

RINGS

Rings are moss circles in beautiful, round, natural wood frames that can easily be hung onto your wall or set on a table as a decor piece. You can choose any moss type and colour that we stock to fill your frame, giving you a larger variety of textures and colours to design with.

Ring Sizing Options (Diameter)

(15") (17") (20")

3" - 4"

Custom sizes available upon request

ACOUSTIC FUNCTION

Mossart Panels have significant sound-absorption.

According to a study conducted by the Centre for Architectural Ecology at the British Columbia Institute of Technology (BCIT), sound absorption is relatively high with signal number ratings (NRC and SAA) in the range of a 3/4"-1" fibre board, or a carpet on underlay pad.

Absorption in this range can be useful in classrooms and conference rooms to improve speech intelligibility and the quality of verbal communication.

FLAMMABILITY

ByNature unicolour reindeer Mossart Panels have been tested for flammability.

The method, designated as CAN/ULC-S102-10, Standard Method of Test for Surface Burning Characteristics of Building Materials and Assemblies", is designed to determine the relative surface burning characteristics of materials under specific test conditions.

After testing three identical specimens, results confirmed that ByNature Mossart panels have an average Flame Spread Rating (FSR) of 95 and an average Smoke Developed Classification (SDC) of 445.

SHEET AND ROCK MOSS

ByNature Sheet and Rock Moss brings a very natural and organic feel to a space. Sheet and Rock moss can be used to create original decor and is often applied as a wall or ceiling covering. It exists in different shades of green, preserved and dried. Standard panels are approximately 3/4" thick.

PRESERVED PLANTERS

Using our 100% natural preserved plants, Preserved folia planters allow for a maintenance free planter that can be inserted into any previously owned or new planters. These beautiful green additions are a wonderful option to add preserved plants without having to drill or hang anything on the wall!

FOLIA PRESERVED TREES

ByNature's exclusive line of trees are 100% naturally preserved. Using an innovative process, moisture in the plant is replaced with a vegetable-based glycerin solution, a component that does not evaporate over time. This process preserves the tree's natural feel and beauty for years with limited maintenance required (no natural light, trimming or water required).

- No maintenance, water or light required
- Long lasting preserved natural trees
- More than 50 different species
- Sizes ranging from 1 ft to 20 ft
- 100% natural

LARGE DIVERSITY OF SIZES, SHAPES, TEXTURES AND COLOURS AVAILABLE.

FAUX

Faux plants give you the freedom to get truly creative with the spaces you have, be it at home or work. Dark corners, no windows or limited space are not a problem. Tailor the landscape to suit your design, no need to worry about the plant altering or changing over time.

FAUX PLANTS

A great imitation of nature, the authentic colours and textures mimic living plants perfectly and like real plants, have a positive impact on the way people feel in a space. When living or preserved plants do not work in a space because of indoor environmental conditions, these exquisite faux plants become the best option.

MORE THAN
1000 OPTIONS

FAUX CEILINGS

ByNature's faux ceiling installations are a beautiful way to add cascading greenery from above, without the natural limitations of our live or preserved products. The wide selection of faux plants ensures you will have a truly unique installation in you space.

LIVING

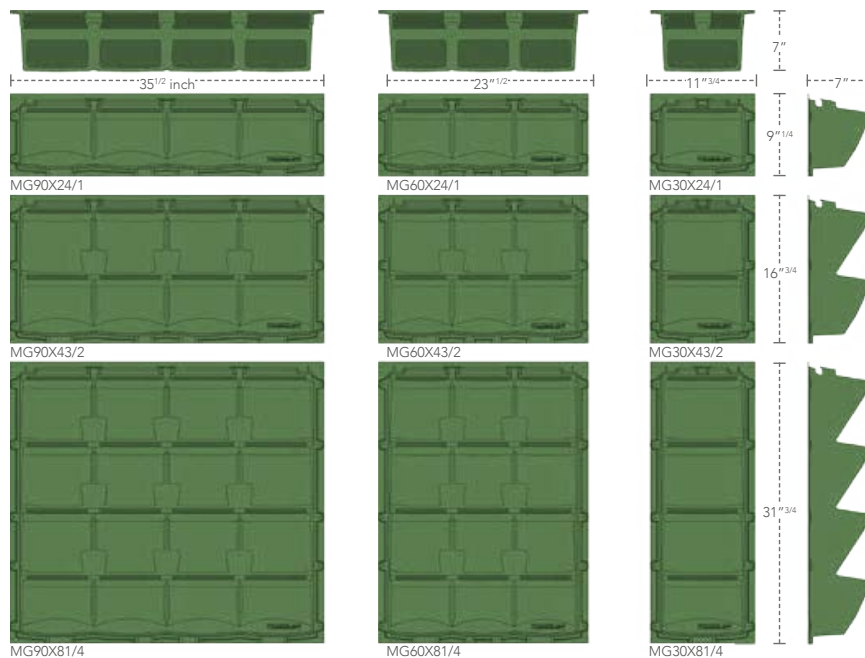

Living plants clean indoor air by absorbing toxins, increasing humidity and producing oxygen. Adding live plants to an office space can be used to create privacy, reduce noise and improve overall air quality.

MODULOGREEN®

Plants thrive when they grow in rich, natural soil with access to regular light and water. That's why we designed the ModuloGreen® Living Wall which comes with a special substrate to ensure optimal plant growth, low maintenance and water consumption requirements. ModuloGreen® Living Walls are also easy to install and one of the most cost-efficient for both you and the environment.

MODULE SIZES & FEATURES

- low cost
- biodiversity
- low maintenance
- wall protection
- phonic absorbent
- sustainable
- energy saving
- low in water consumption
- easy to install
- large plant diversity
- easy planting
- recyclable
- engineered growing medium
- C2C® certified

ModuloGreen® Living Wall is the first Cradle-to-Cradle certified living wall system in the world. Made from recycled plastic and recyclable after use, the smart design of the module also evenly distributes and circulates water while optimizing the system's water consumption (220 litres / m² / year for an exterior living wall or 110 litres / m² / year for an indoor wall).

PANEL INSTALLATION

Modulogreen® green walls are mounted using a wide diversity of methods and materials with the idea of keeping installation easy. Traditional studs can be used for small indoor applications while engineered brackets can be used for outdoor large scale applications. Traditionally, air space between the wall and the living wall is created to limit the risk of condensation.

1. Aluminium brackets/studs
2. Stainless steel self-drilling screw/anchors
3. Self-regulating dripline
4. Planting cells
5. Filter

WATER DISTRIBUTION

1. Filter + draining layer
2. Drainage holes
3. Internal water distribution
4. Growing medium
5. Collecting gutter

IRRIGATION

1. Controller
2. Valves (variable numbers)
3. Fertilizer injector mounted in by-pass
4. Filter
5. Pressure regulator with gauge
6. Check valve
7. Water inlet (disconnected)

Proper irrigation of a green wall requires a dedicated water supply. Ideally, a living wall system should be plugged into the main water supply with an automatic irrigation system (pictured on the left) or irrigated with rainwater (if outdoors). If there is no access to water, a reservoir connected to a pump and timer assembly can be installed or hand watered.

LIVE PICTURES & LIVE DIVIDERS

All Live Systems use a cloth wick to deliver water to the plants, so there is no need for pumps, drip lines, electricity or plumbing.

- Low maintenance; water once every 3-4 weeks
- Easy installation - no plumbing or electricity required
- Lightweight system can be installed directly onto drywall
- Easy cassette replacements and seasonal rotations
- Interchangeable plant cassettes
- Wicking irrigation system
- Customizable frames

SYSTEM

1. Cassette (9 four inch plants each)
15.75 x 15.75 x 3.5 inch
2. Cotton wick

EVERYTHING PLANTER / EVERYTHING TABLE

The Everything Planter is suitable for indoor and outdoor use. The generous 34-litre capacity appears to float larger plants off the ground, giving the planter a visually light profile. No green thumb? Use it as an ice bucket at your next party.

CUSTOM
SIZES
AVAILABLE

Visually inspired by Japanese Taiko drums, Use the Everything Table as a terrarium and to display your greenery in your home. Access the inside via a 5" inch hole opening in the glass.

BABYLON LIGHT

Inspired by the hanging gardens of Babylon, the Babylon Light is a multifunctional pendant for those who love plants but not the clutter of flowerpots.

Materials: Powder-coated Spun Aluminum, Stainless Steel Cable, Nickel-plated Hardware

Dimensions: 38cm x 15cm / 15" x 6"

Drop Height: 182cm / 72"

Supply: 120 – 240v

Source: E26 lampholder, 60 watt max, Bulb not included

Canopy: Powder-coated Spun Steel, 15cm x 1cm / 5" x 0.5"

Colour: Gloss White

ALL LIGHT
FIXTURES CAN
BE PLANTED
WITH LIVING,
PRESERVED OR
FAUX PLANTS

WELL PLANTER LIGHT

The Well Light is both an evolution of design from the Babylon Light and a refined industrial pendant. The name comes from the use of a 'well glass' diffuser. The removable shade/basin allows for easy maintenance and more growing options such as herbs.

The Well Light provides downlight ideally suited for over a table or work area.

Materials: Powder-coated Spun and Cast Aluminum, Frosted Glass and Stainless Steel hardware

Dimensions: 30cm x 40cm / 12" x 15.75"

Drop Length: 182cm / 72"

Supply: 120 – 240v

Source: E26 lampholder, 60 watt max, Bulb not included

Canopy: Powder-coated Spun Steel, 30cm x 10cm / 12" x 4"

Colours: Dome — Satin White or Matte Black

Ring — Gloss White or Gloss Black

Shade — Gloss White or Gloss Black

HEMISPHERE PENDANT PLANTER

Add a burst of colour to the soft curves and refined brass details of the Hemisphere Pendant while the opal glass diffuser will softly light your space.

Materials: Aluminum, Brass, Stainless Steel, Opal Glass

Dimensions: 8" (20cm) x 15" (38cm)

Drop Length: 72" (182cm)

Supply: 120 – 240v

Source: G9 lampholder, Bulb not included

Canopy: Powder-coated Steel 5" (15cm) x 0.5" (1cm)

Finishes: Aluminum: powder coated gloss white Brass: brushed, uncoated (will patina with use)

NATURACORK

Great addition to any preserved product or on its own, our Naturacork LINE will bring natural textures to your space. It is a natural acoustic product, sustainable, hypo-allergenic and fire-retardant.

CORK BRICKS

- Dimensions: 25/32" x 9 29/64" x 31 1/2"
(20mm x 240mm x 800mm)
- One Tile = 2.07 sf
