

[BYNATURE]

Enjoy. Breathe. Feel good.

Preserved Plants & Flowers

ByNature

SPECIALISTS IN BIOPHILIC DESIGN

We create strong connections between nature and the indoor environment

BYNATURE VISION

Nature plays an essential role in our lives by improving our wellness, happiness, health, and even our productivity. Yet, while we spend 85% of our time indoors, there is still an increasing lack of nature in our living spaces.

ByNature believes that any space could be transformed into a healthy living environment. We aspire to bring nature into everyone's lives by creating an experience for people to enjoy, breathe, and feel good.

BYNATURE MISSIONS

Whether small scale, large scale, living or preserved, ByNature's team of passionate people are dedicated to using their knowledge of biophilic design principles to liven your home or office space.

ByNature's vision, however, could not happen without its growing network of visionary partners (architects, designers, landscapers, engineers, and creative visionaries alike). Together, we bring our unique expertise to the table to promote, educate and innovate by creating and sourcing new leading-edge technologies that make your living space a better place.

ENJOY. BREATHE. FEEL GOOD.

FOLIAGE

ByNature's exclusive line of 100% natural preserved plants can be used to create an endless possibility of designs; from ceilings to unique frames and wall creations.

This natural decor will last for years and will not require any maintenance (no natural light, trimming or water required).

ASPARAGUS PLUMOSUS

Available in: green // Length: 27 in //

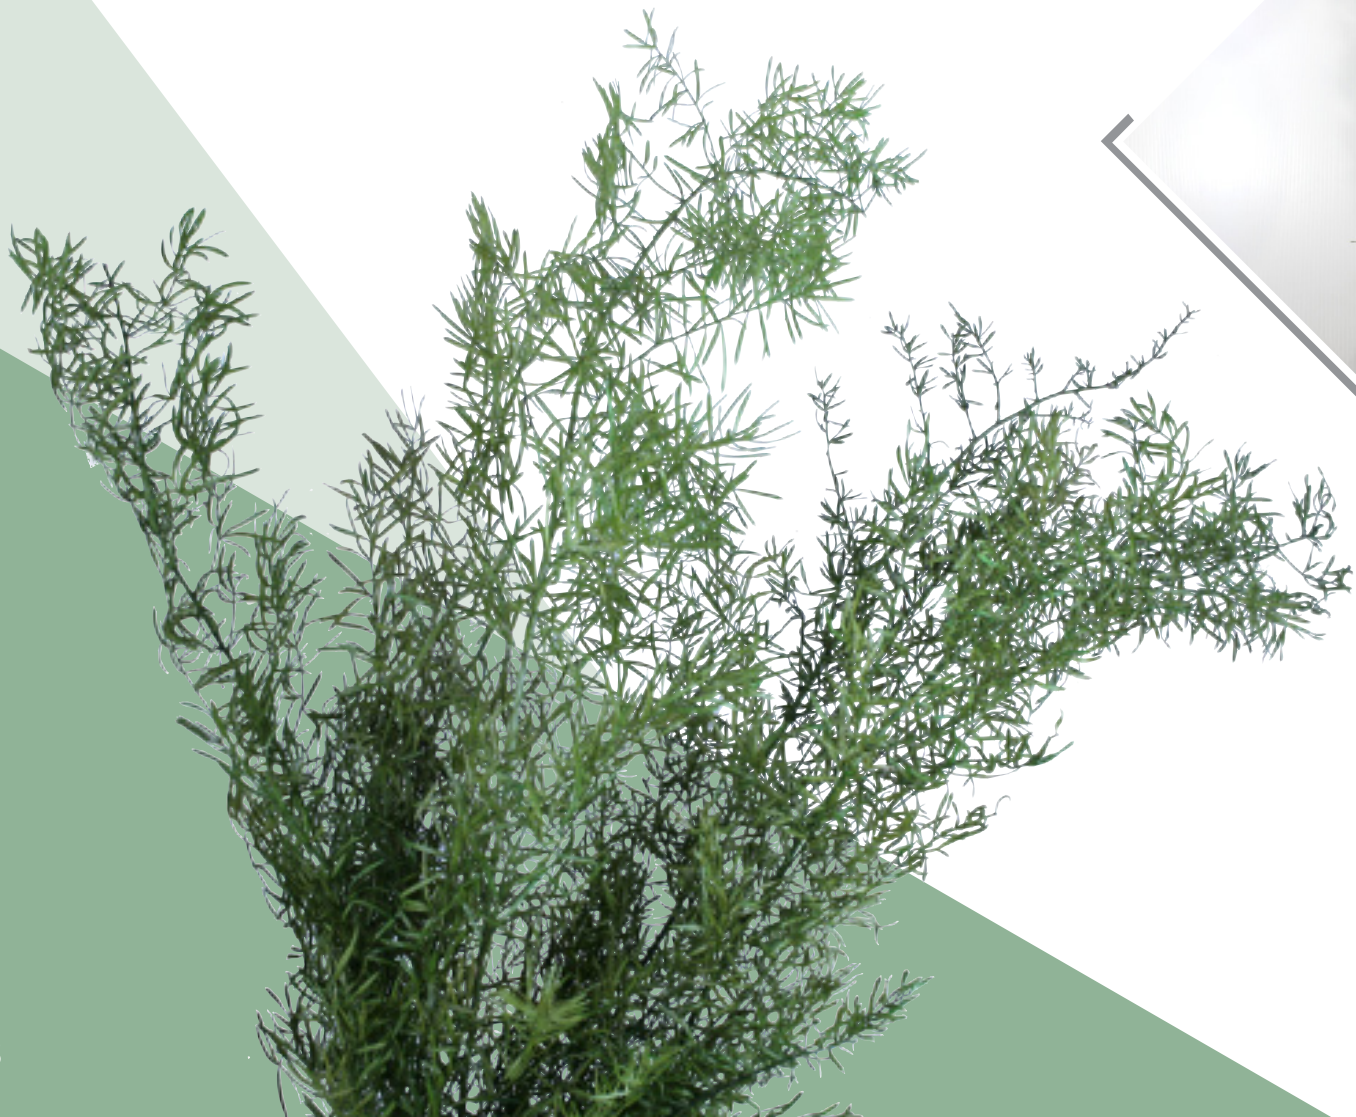

Bunch size: 6 stems

ASPARAGUS SPRENGERI

Available in: light green // Length: 22 in //
Bunch weight: 100g

BARBA

Available in: green, red, yellow and
light green // Length: 30 in // Bunch
weight: 100g

BEAR GRASS

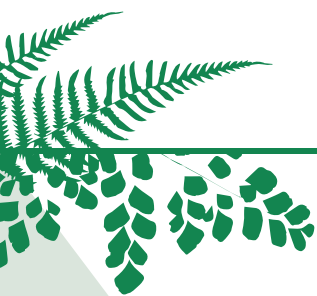

Available in: dark green and green // Length: 26 in //
Bunch weight: 100g

BRIGHT GRASS

Available in: light green // Length: 40 in //
Bunch weight: 100g

BUXUS

Available in: green // Length: 27-32 in //
Bunch weight: 200g

CHESTNUT OAK

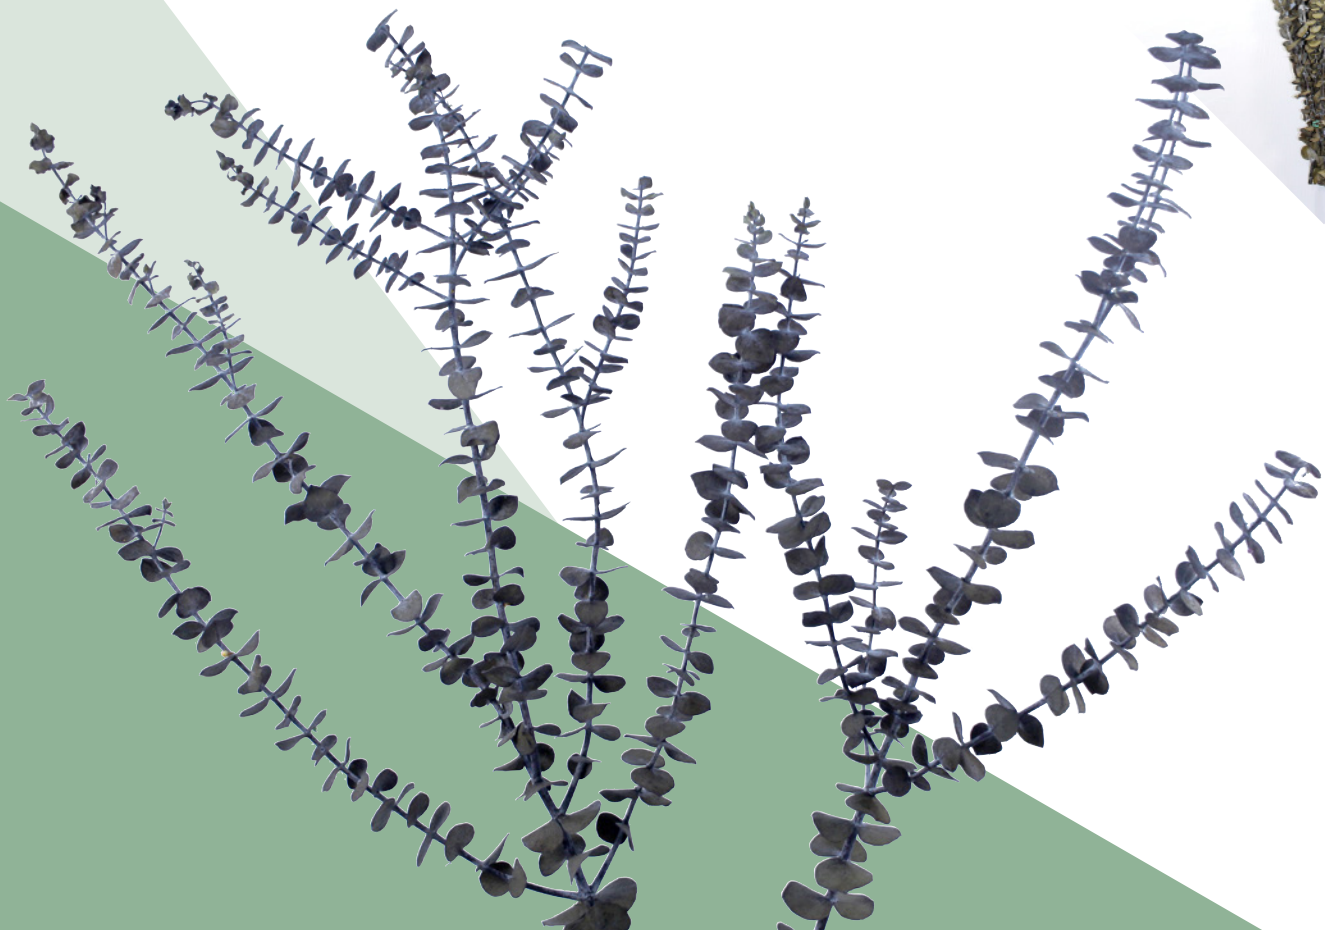

Available in: green // Length: 23 in // Bunch Weight: 150g

FUCALYPTUS BABY

Available in: blue green // Length: 31 in //
Bunch weight: 150g

EUCALYPTUS CINEREA

Available in: red and blue green //
Length: 25 in // Bunch weight: 150g

EUCALYPTUS NICOLY

Available in: green and red //

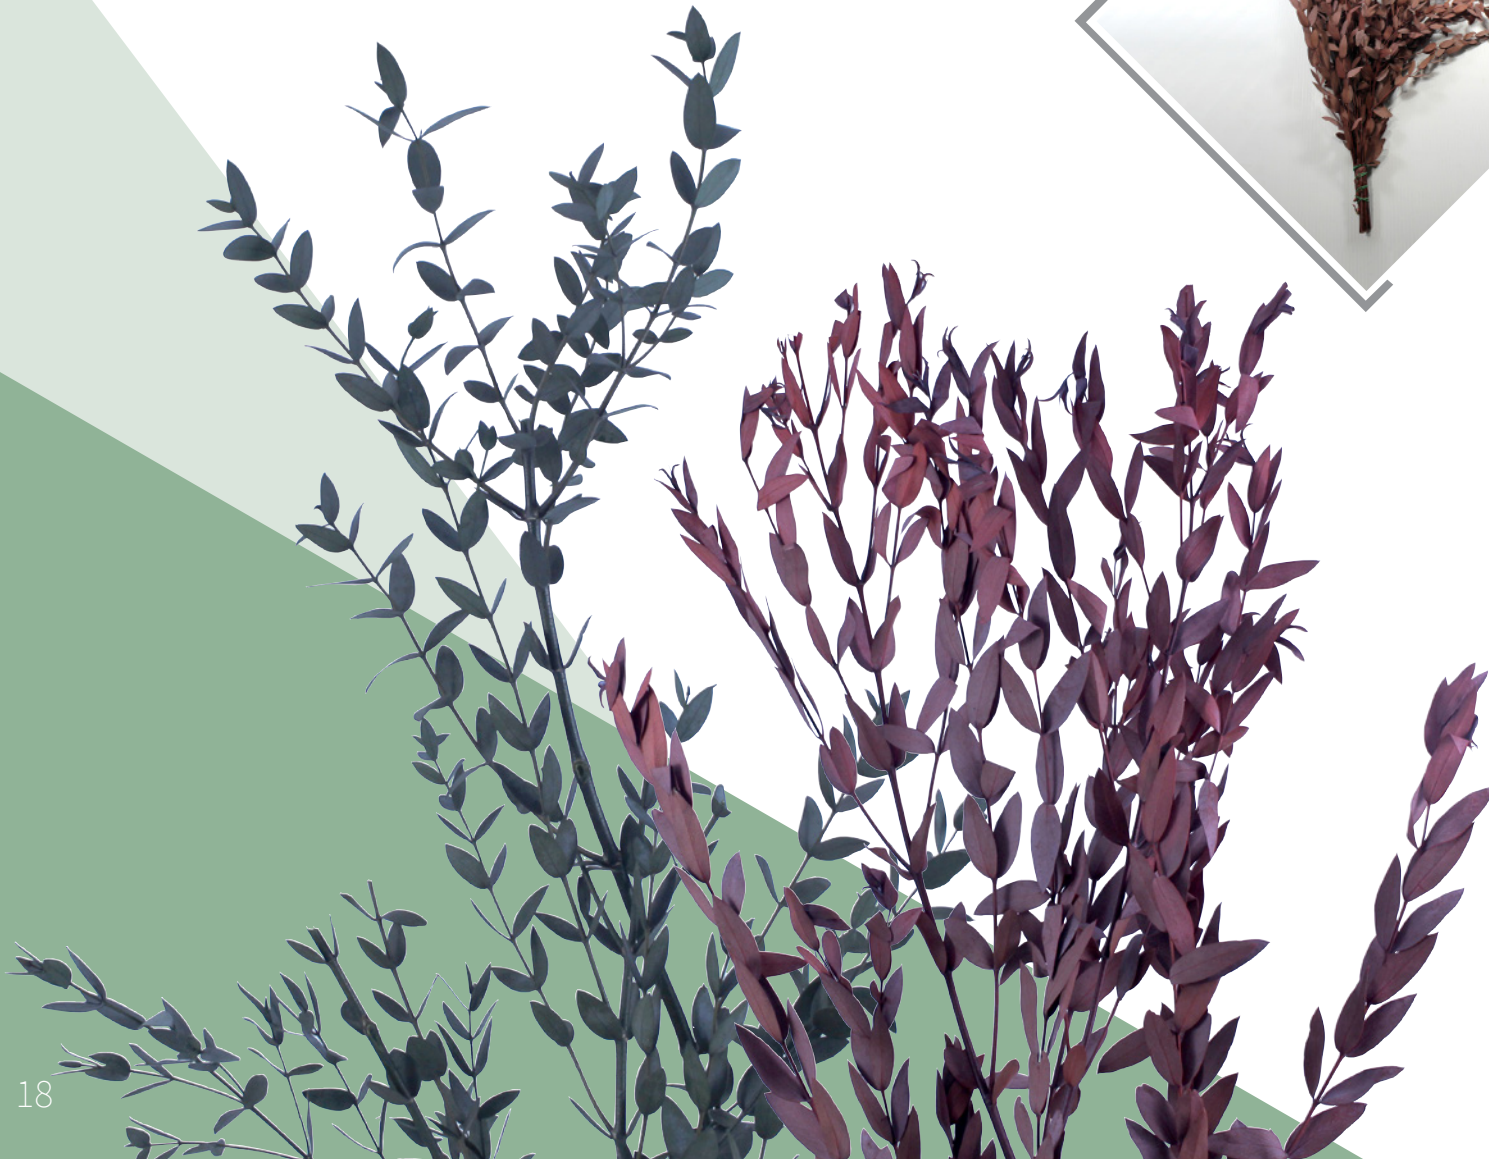

Length: 25 in // Bunch weight: 150g

EUCALYPTUS PARVIFOLIA

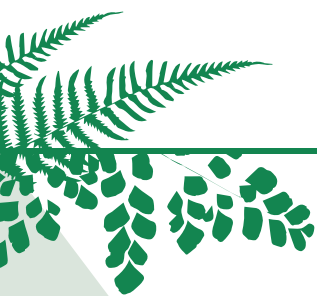

Available in: green and red // Length: 25 in //
Bunch weight: 150g

EUCALYPTUS PENDULA

Available in: green // Length: 25 in
// Bunch weight: 150g

FUCALYPTUS POPULUS

Available in: red and green // Length: 25 in //
Bunch weight: 150g

EUCALYPTUS STEWARTIANA

Available in: green, red and
autumn // Length: 25 in //
Bunch weight: 150g

FAGUS

Available in: green, red, yellow and autumn //
Length: 30-40 in // Bunch weight: 150g

IVY

Available in: green - without fruits //
Length: 20 in // Bunch weight: 150g

LYCOPODIUM VINE PREMIUM

Available in: green // Length: 60 in
// Stems: 6

OAK

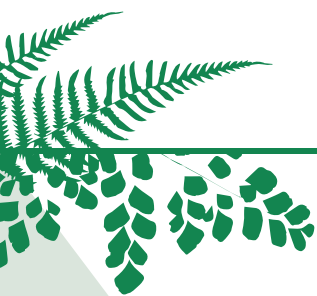

Available in: green // Length: 22 in // Bunch weight: 150g

OLIVE BRANCH

Available in: green // Length: 27 in //
Bunch weight: 100g

PHOENIX PALM

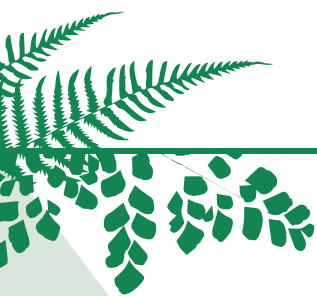

Available in: green // Length: between 19 in to 25 in
// Stem: 1

PAPYRUS

Available in: green // Length: 25 in // Stems: 6

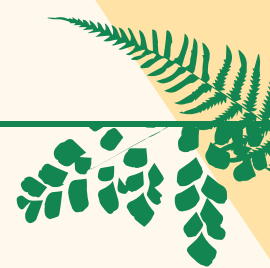

PITTOSPORUM

Available in: green and red // Length: 20 in // Bunch weight: 100g

ITALIAN RUSCUS

Available in: light green, red, yellow, orange // Length: 30 in // Bunch weight: 100g

SALAI

Available in: green // Length: 20 in // Bunch weight: 100g

THUJA

Available in: green // Length: 25 in // Bunch weight: 200g

TREE FERN

Available in: green // Length: 30 in //
Bunch weight: 100g

MOSSES

WHAT IS A PRESERVED MOSS?

Mossart creations are made with 100% natural mosses that require no watering, light or trimming.

Harvested according to ecological practices, the moss is preserved by replacing the water in the plant with glycerine. As there is no longer any water in the plant, it will never dry out and will maintain its natural texture.

HOW TO MAINTAIN A PRESERVED MOSS?

Mossart is an indoor-use product only and its softness may vary according to the relative humidity of the room. In the case of a very dry environment (below 30% humidity), the moss may dry out but you will find that it will become soft again if placed in a room with proper relative humidity or when the relative humidity goes back to normal. This variation is usually related to the season. A relative humidity considered as “normal” is usually between 45 and 65%.

When soft, the moss should never be watered or sprayed. Be aware that the “softness state” of the moss does not change its look, it will always look green, fresh and natural. You will experience a natural scent for a few months, which will progressively fade. The Mossart product should never be placed in direct sunlight as the colour may fade. If required, the moss could be carefully dusted using a blow dryer on a low temperature setting.

REINDEER MOSS

Available in 19 colours // Thickness: ~5 cm // Box weight: 9 lb // Bag weight: 1/2 lb

Dark Green

2 TEXTURE OPTIONS

Grade A (left): higher quality using only the top part of the moss
