ONCE UPON A TIME, BYNATURE...

Nature plays an essential role in our lives by improving our wellness, happiness, health, and even our productivity. Yet, while we spend 85% of our time indoors, there is still an increasing lack of nature in our living and work spaces.

It is with the belief that any indoor space can be transformed into a healthy living environment that Nicolas started ByNature in Vancouver in 2011.

With our passionate team, we are committed to sharing our expertise and biophilic knowledge to bring life and plants into your indoor spaces.

ByNature’s vision, however, could not happen without its growing network of visionary partners (architects, designers, landscapers, engineers, and creative visionaries alike). Together, we bring our unique expertise to the table to promote, educate, and innovate by creating and sourcing new leading-edge technologies that make your space a better place.

OUR SERVICES

consultation - manufacturing - installation - wholesale - maintenance

ByNature offers a comprehensive approach to your project to address all your needs when it comes to designing green spaces. We provide consultations, design, maintenance, installation, and rental services.

OUR VALUES

We are committed to using eco-friendly and sustainable materials that respect the environment.

Our artisanal production techniques ensure that each project we create is unique and customized to meet your specific needs. All our manufactured projects are made in Canada.

ETHICALLY HARVESTED

Our mosses are ethically harvested in Europe using sustainable techniques to ensure we do not harm nature in the process.

PRESERVED SHEET MOSS

Our sheet mosses are available in multiple shades of green and a range of thicknesses to provide you with more design options.

With our expertise in manipulating moss, we can create patterns and complex designs to suit any style or preference.

TEXTURED MOSS OPTIONS

Our unusual textured moss species introduce a subtle, additional texture and visual appeal to any project.

These lesser-known types of moss are ideal for bringing interesting natural textures and depth of colour to projects.

ROCK MOSS

PRESERVED TEXTURED MOSS

Our textured mosses are available in multiple shades of green and various textures to provide you with a range of options to choose from. Unique and varied products combined with our deep knowledge of moss and our design experience means we can create intricate patterns, colour and texture combinations resulting in an innovative custom piece for every job.

PRESERVED POLE MOSS

Another unusual type of moss, pole moss, look like moss pebbles. They are available in different shades of green and different textures. These interesting mosses add volume and texture while elevating the natural look of preserved projects.

MIXED MOSS PROJECTS

Mixed moss walls provide a natural and soothing touch to your indoor space. With a variety of colours and textures, they add an organic and lively dimension to your decor.

GRAPHICS

MIXED MOSS PROJECTS

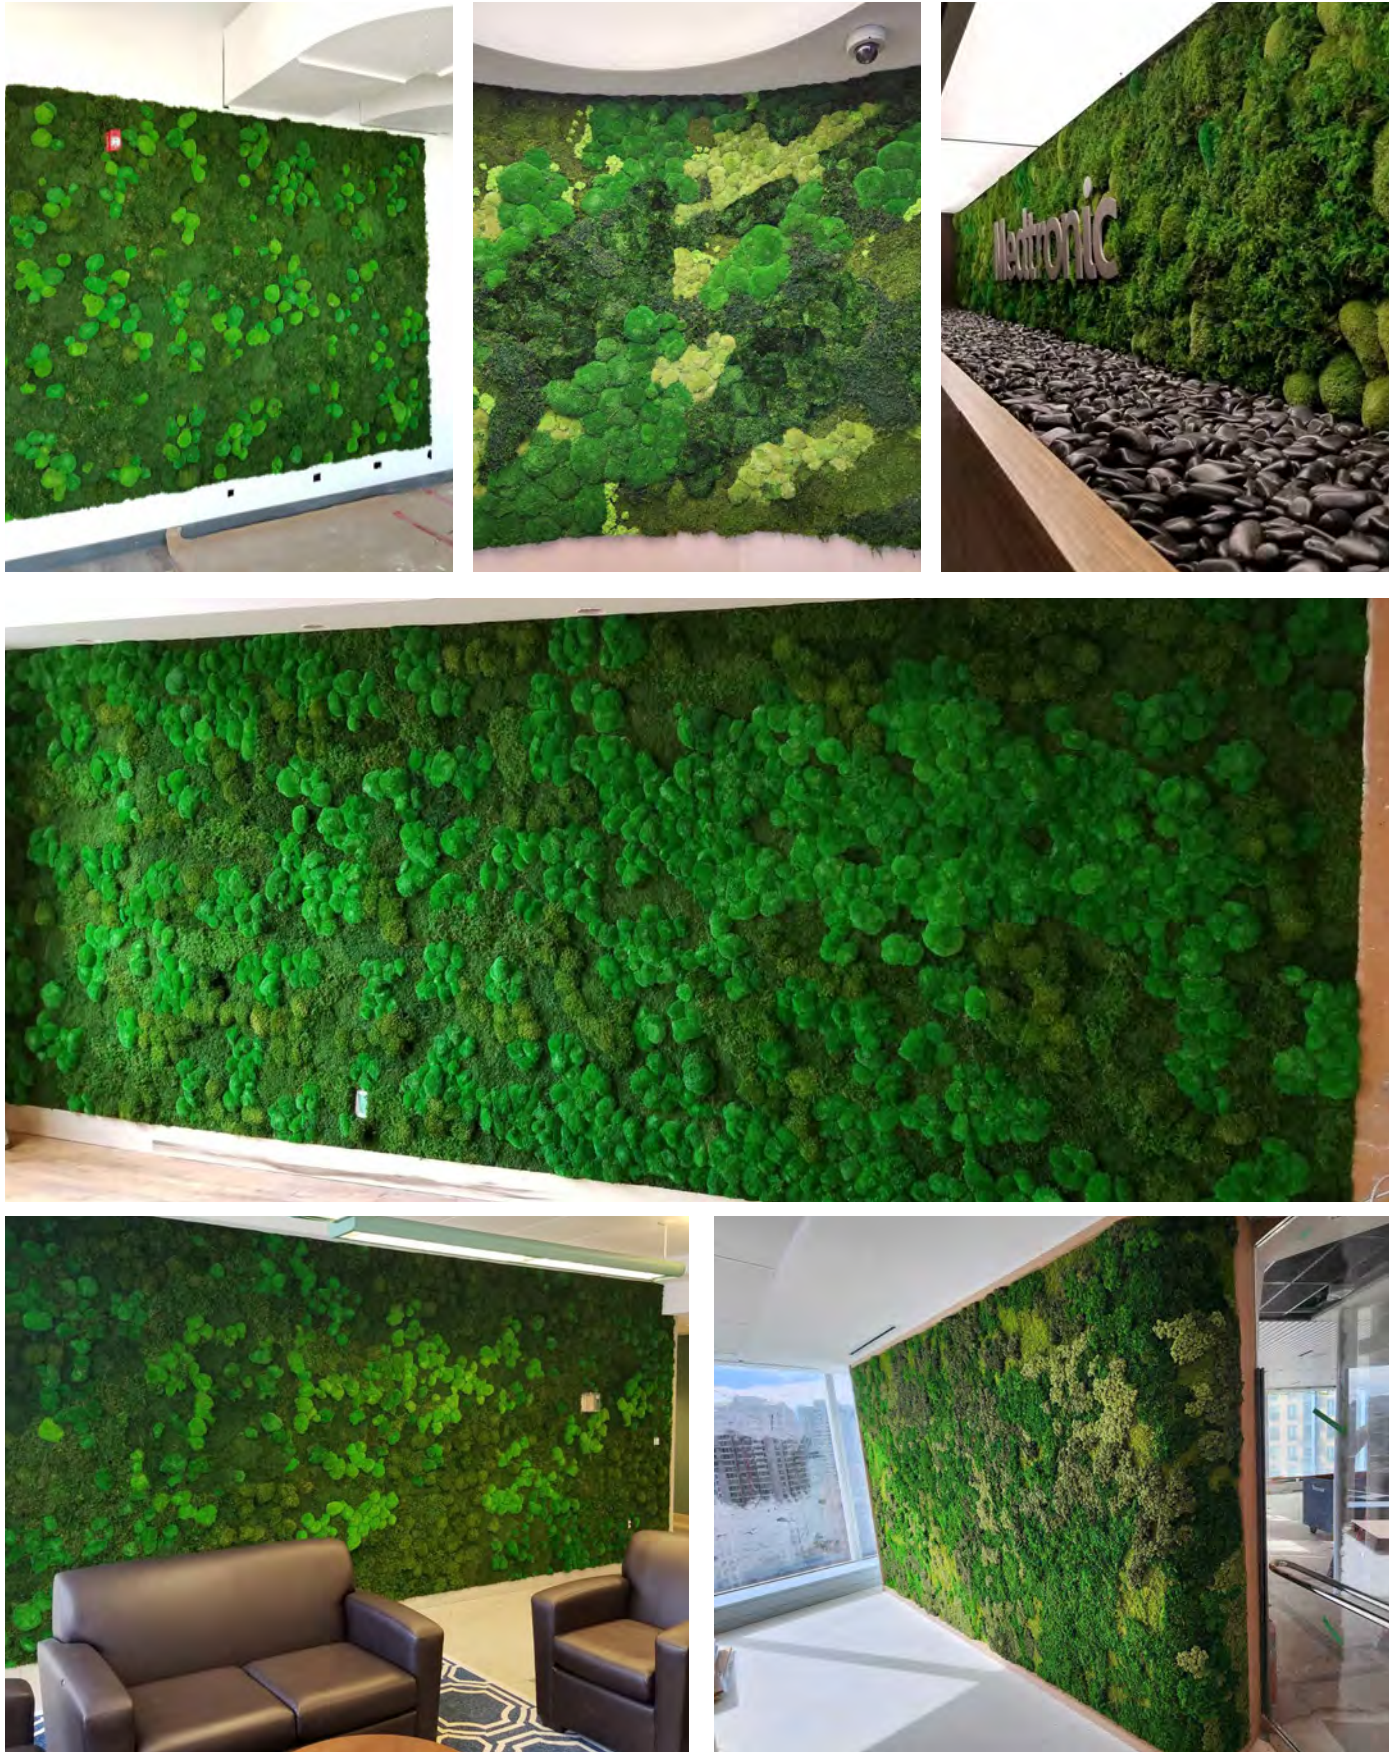

Our walls are manufactured using natural mosses preserved on corrugated plastic panel bases. Walls can also be preserved on cork, wood or fabric panels for an additional charge. They are durable for many years and require low maintenance.

Our team of professionals collaborates with you to understand and target your design needs and preferences.

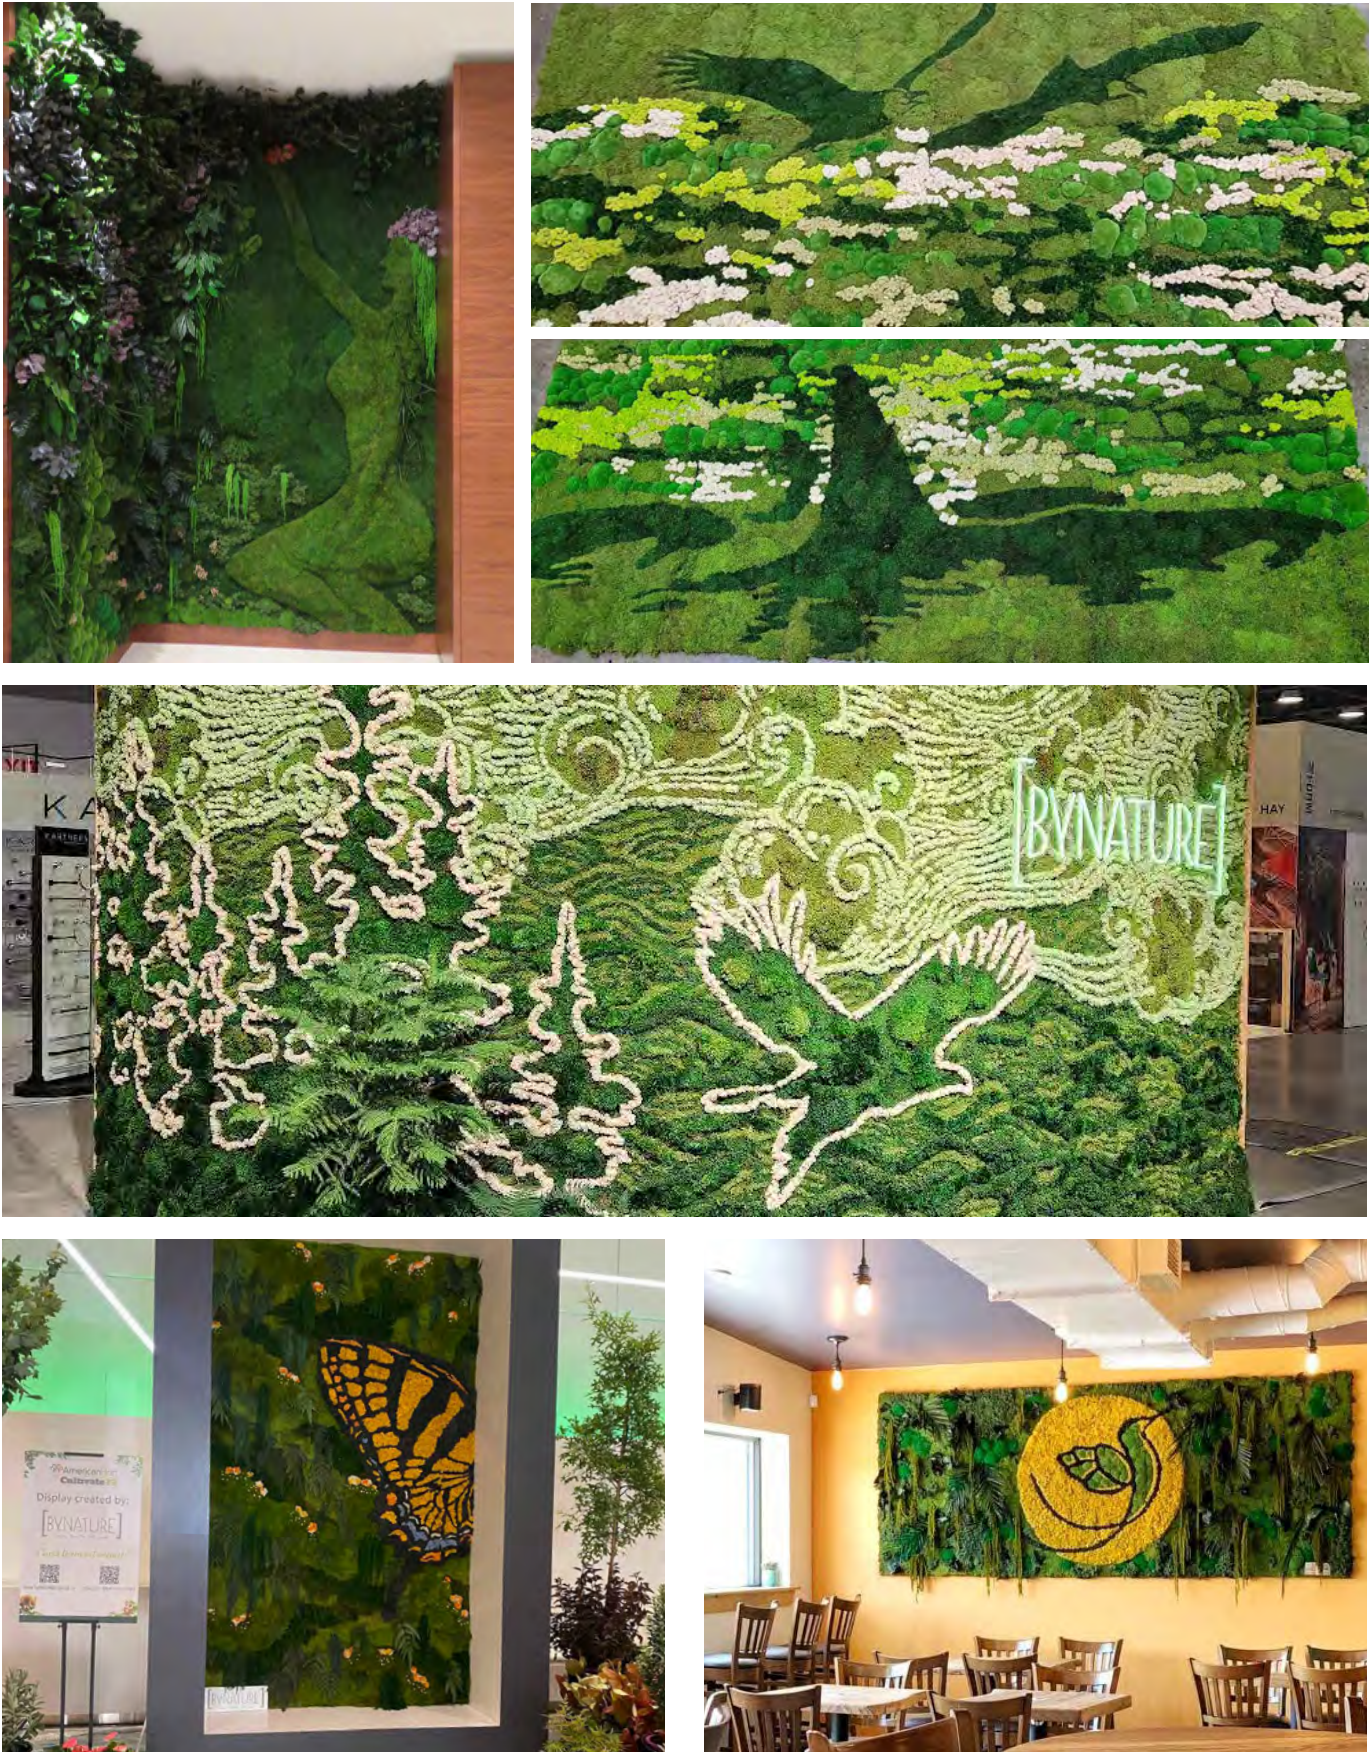

We believe that each moss wall is a unique work of art that reflects your personality and style while echoing your values.

FRAME STYLES

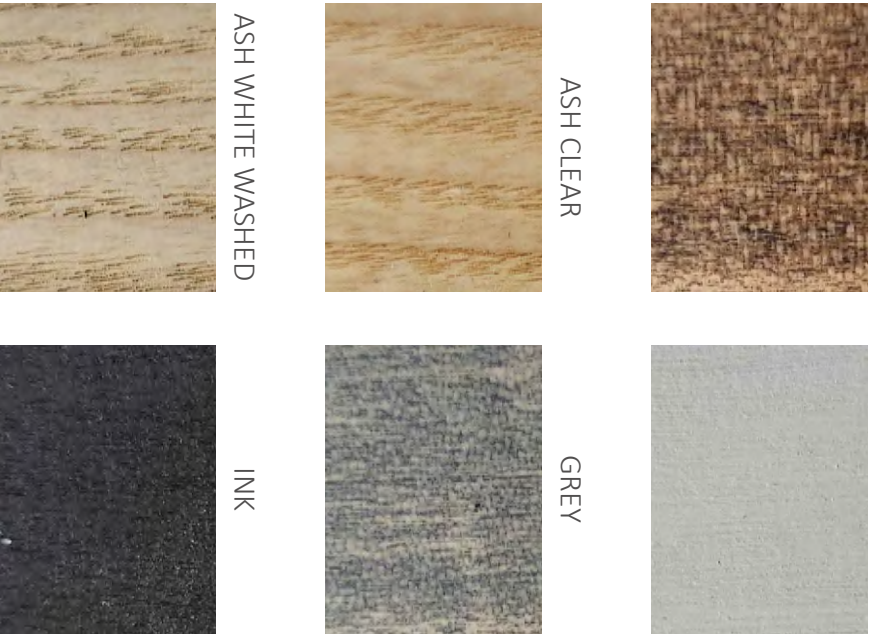

Frames are custom made for each order. Standard frame faces are 3/4" or 1 1/2". Standard depths are 1 1/2", 2 1/2", and 2 3/4". Most frames have a backing plywood panel that can account for approx 1/4" - 1/2" of the interior frame depth.

WOOD STAINS

PAINTED FINISH ALSO AVAILABLE

CUSTOMIZED LOGOS

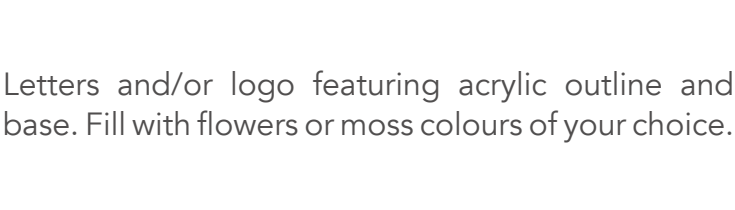

A logo is a key element of an organization’s visual identity. Adding your custom-built logo to your office lobby, reception area, waiting room, meeting room or restaurant creates a memorable branding of your organization’s professional space.

ACRYLIC

Laser cut for clean lines. Most styles of letters and logos can be produced. Comes in an assortment of colours.

ACRYLIC CHANNEL LETTERS

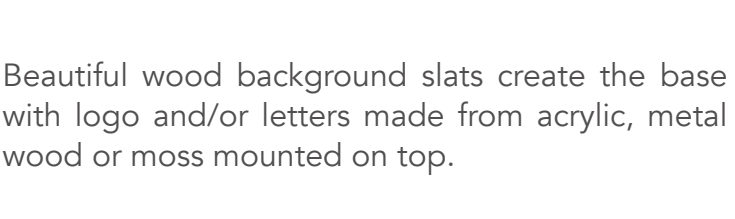

Letters and/or logo featuring acrylic outline and base. Fill with flowers or moss colours of your choice.

CUT LETTERS COVERED

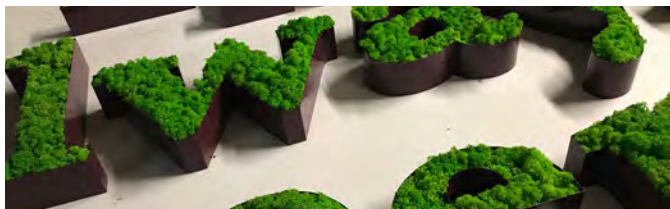

Logo and letters are laser cut then moss is applied to the surface for easy to mount moss designs. Choose the colour or colours of moss for your logo.

WOOD LOGOS

Beautiful wood background slats create the base with logo and/or letters made from acrylic, metal wood or moss mounted on top.

METAL CHANNEL LETTERS

Letters and/ or logo featuring metal outline and base. The channels in the middle are filled with coloured moss or flowers. Ask us about custom fillings.

WOOD CHANNEL LETTERS

Letters and/or logo featuring wood outline and base. The channels in the middle are filled with coloured moss or flowers. Ask us about custom fillings.

METAL LETTERS

Precision laser cut metal letters and/or logo. Finish, size and style options available.

EMBEDDED WOOD LETTERS

Narrow laser-cut letters and/or logo embedded in a moss background. Choice of wood and moss colours available.

MOSS LOGOS

Logo and letters created by glueing coloured moss to backing, surrounded by moss and/or preserved folia and flowers.

NEON LED SIGN

Custom-made neon LED logo and/or letters, assorted styles available. Electrical access is required for installation.

BACKLIT

Wood or Metal laser cut logo and/or letters fitted with back-mounted LED lights. Electrical access is required for installation.

PLANTER OPTIONS

The sky is the limit when it comes to planters. We offer a very wide range of preserved ferns, foliage, and flowers for your planters.

Ferns

Foliage

Flowers

OPTION 1: PLANTERS AND PRESERVED PLANT INSERTS

If you don't have the planters for your preserved plants, we can provide them!

We have a huge selection of planters to fit your space and your desires for your project: we can select different colours, different sizes, and materials depending on your vision of your ideal planter.

We can make a selection of ferns, foliage, and/or flowers and manufacture the inserts which will be placed directly inside the planters.

OPTION 2: PRESERVED PLANTER INSERTS ONLY

Manufactured inserts

Installed inserts

If you already have the empty designated space/planters and only need the preserved plant inserts, we can do it too!

They are custom and very easy to install.

PRESERVED PLANTERS

Passionate about creating unique and sustainable interior design solutions, we are proud to present our range of preserved planters, which are not only aesthetically pleasing but also very practical because they require low maintenance.

Our projects are designed to mimic the look and texture of living plants and mosses in nature while offering the durability and practicality of a preserved product. Their maintenance-free characteristics, with no size limit, make them perfect for indoor spaces.

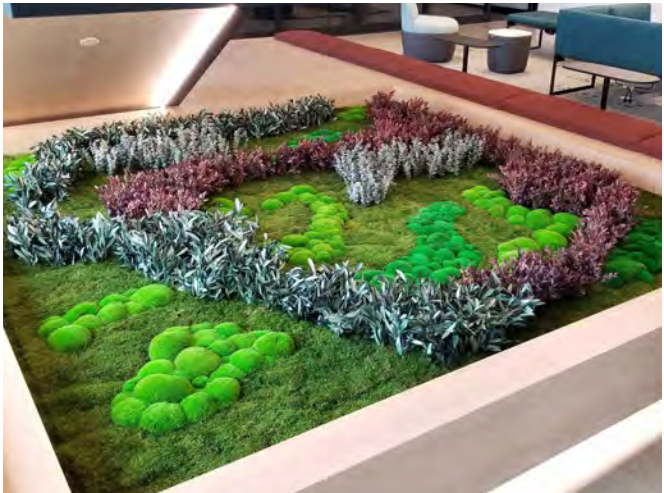

PRESERVED FLOORS AND CEILINGS

Because we like to shake things up to discover the most innovative solutions for your interior space, we also offer preserved projects installed on the floor as well as on the ceiling.

Biophilic design is not limited to wall installations; that’s why we can create various types of preserved projects on the floor or ceiling, providing a natural and organic appearance.

FLOORS

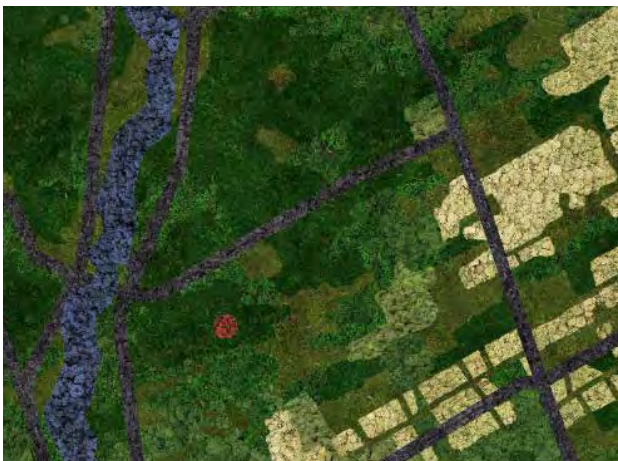

CEILINGS

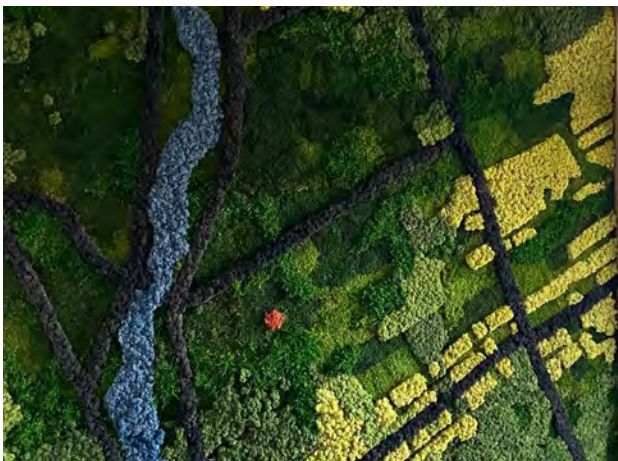

ADDITIONAL FEES

Some additional fees can apply for your project.

DESIGN / FINAL RESULT

design/render

final result

A render is a detailed preview of how your project will appear upon completion.

It enables you to visualize your project and confirm that we have accurately understood your expectations. Our renders are crafted by our design team to ensure that every aspect of your project is considered.

Our production team diligently adheres to the render specifications to ensure that your project is carried out in accordance with your expectations.

In the absence of a render, any additional edits not previously mentioned will incur additional charges. We want to make sure that you are completely satisfied, so we encourage you to add a render to your order to avoid any additional costs or potential disappointment.

BACKING UPGRADE OPTIONS

Standard backing for preserved Moss & Folia projects is corrugated plastic.

You can upgrade the backing to Ecofelt, Cork or Plywood for an additional charge.

MOSS ART EDGE

The moss art edges conceal the backing to which the moss is adhered.

When the project matches the wall size, we avoid using them, but when it's not the case, it allows for more refined finishes.

WOODEN FRAMES

Whether you prefer a simple and elegant wooden frame or a more complex one with sophisticated details, our partner carpenter can create the frame that meets your needs.

WOOD PIECES

The addition of wood can transform your wall or frame by introducing a new texture and adding depth. We employ secure attachment techniques to guarantee the safety and durability of the wood addition.

VOLUME

The reliefs seamlessly integrate into projects and can be customized in various shapes, sizes, and heights.

They enhance depth and dimension in any project.

YOU SHOULD ALSO THINK ABOUT

Shipping fees: These are calculated during the quoting process but should not be overlooked when you choose your project.

Installation fees: If you don't have an installer, we work with a large network of installers across North America to ensure the installation of your project wherever you are.

OUR PORTFOLIO

After more than 10 years of activity in North America, we have expertise that outperforms any competition, with over 10,000 projects to our name.

BRAND REPRESENTATIVES

ByNature is present across North America and has a network of brand ambassadors throughout the United States and Canada.

Transform your indoor spaces and enhance well-being with the help of ByNature’s biophilic design experts. Our network of experienced brand representatives, offers exceptional guidance throughout the entire process.

From initial consultations to project completion, our representatives will leverage their extensive knowledge and local market insights to turn your vision into reality.

HEALTHY SOLUTION

Our preserved mosses are natural and free from harmful substances for both health and the environment, as they do not emit any VOC toxins.

FREQUENTLY ASKED QUESTIONS

IS THERE A SMELL?

Preserved moss has a slight smell once installed in your space.

No need to worry though, the smell will dissipate over the weeks!

WHAT DOES PRESERVED MEAN?

It’s simple: the plants, flowers and mosses are real and used to be alive.

Our mosses are preserved using food dyes and vegetable oils to maintain their fresh and natural appearance without requiring any specific maintenance.

HOW DOES MAINTENANCE WORK?

Very low maintenance for perserved moss and plants! It is recommended to maintain a humidity level of at least 30% to prevent the products from drying out.

Direct sunlight is also not advised, as it may cause the products to fade.

WHAT IS THE LIFESPAN OF OUR PRODUCTS?

Several factors need to be considered, such as exposure to sunlight, room temperature, and humidity. Our preserved plants and mosses have a lifespan of approximately 1 to 10 years. If a plant begins to wither, it will need to be replaced.

CONTACT & INFORMATION

Our team of biophilic specialists is always delighted to answer all your questions and assist with your project.
