

# [BYNATURE]

The image shows a modern building with a glass-fronted ground floor and balconies above. A series of large, light-colored rectangular planters are lined up along the sidewalk in front of the building. Each planter contains a tree or a large shrub. The ground is paved with light-colored stone tiles. The overall aesthetic is clean and contemporary.

A modern rooftop pool at night. In the foreground, a large, white, oval-shaped planter sits on a light-colored deck. The pool's edge is visible in the lower left, with clear blue water. In the background, a city skyline with illuminated buildings is visible under a dark sky. The scene is framed by a dark, modern architectural structure with recessed lights.

# RECTANGLES

Small enough to fit on a shelf, large enough to completely close off the rest of the world and surround yourself with nature. Our rectangular planter collection is so vast, you're sure to find the perfect fit.

There is no space or design scheme that these planters will not add a special flair to.

# 10” Wide Collection

Slender and sleek, our 10-inch-wide collection is perfect for narrow spaces. Offering two different heights (24 and 32 inches) in multiple lengths, this series is ideal when the form and function of a rectangle is desired, but space is limited.

# 12” Wide Collection

One of our newest additions is the 12-inch-wide collection with the opening snugly accommodating a 10” grow pot. This series offers three different heights (18, 24 and 32 inches) providing the opportunity to accomplish disparate design objectives. Each planter is available in multiple lengths and includes a corner piece option lending a hand to extraordinary design flexibility.

# Rectangle Specialty Use

The Nile wall-mounted collection is designed as a low-profile option for adding greenery without sacrificing your floor space. Built-in and predrilled reinforcement plates enable quick and secure mounting on any vertical surface. For patios, or areas with hand or guard rails, we offer our Tiergarden railing planter, the perfect home for plants atop railings.

# Modular / Linear

Modular designs consist of related, but not uniform, design elements. It can incorporate planters with different heights and similar depths for a clean linear, yet tiered, visual. Corner units can be used to create fluid turns or returns. Or styles can be completely mixed and matched for unique custom groupings. This collection highlights a sampling of planters that are easily combined to create functional space dividers or simply enhance and beautify your space.

\* Tiered Rectangles and Corner Square planter layout.

# ROUNDS

Offering a fresh take on an all-time favorite planter shape, round planters by Jay Scotts will grace any space with timeless class and elegance.

Modern tall round planters, traditional bowl planters, globe sphere planters, cylinder pots, or any oval, ribbed and unique designs that fit both indoor and outdoor decor.

# Teardrop

Replicating nature's simple beauty, this collection features a reverse taper or teardrop shape. Broad and stable at the base and slimming toward the top this collection exemplifies elegance.

# SQUARES

The symmetry of square cube planters, together with their hard lines, add a modern edge to both interior and exterior landscaping. Use large square planter boxes to accent your patio furniture, or smaller modern square planters to accentuate interior spaces!

# Short Square Taper

These planters showcase sleek and simple lines, true classic square shapes that easily accentuate patios, porches, and balconies while providing an eye-catching focal point.

# Planting Guide

---

Potting soil mixture should be used in any/all planters when planting. Potting soil is specially formulated for planter and container gardening. It consists of a mixture of soil, humus, and peat, but can vary from brand to brand. To ensure you are using the correct type of potting soil for your plant(s), check with a professional to determine the correct regional and plant specific soil to be used.

Planters installed outdoors must have drainage holes. During months when temperatures are at freezing or below, water remaining in the soil or planter will freeze and expand which may cause damage to the planter. We do not recommend drainage holes on interior installations.

Our planters are designed to be used without saucers and have feet to allow for water drainage in outdoor applications.

## Best Practices

### **Direct Planting:**

1. Insert a layer of landscape fabric.
2. Add a layer of gravel.
  - a. **Best practices:** rinse the sediment off the gravel prior to installing.
3. Insert another layer of landscape fabric.
4. **Optional:** use foam to build up the pot to desired height.
  - a. For commercial installations, higher altitudes, and roof decks – consider adding more rocks (like lava rock), instead of foam, to achieve desired plant height.
5. Once desired height is achieved, insert a drop tray.
  - a. **Best practices:** a grow bag can be used instead of a nursery pot. Grow bags should be the same gallon size as the nursery pot. This ensures no unnecessary air gets in the soil and roots and reduces dirty run-off and staining.
6. Once in place, use filler around the nursery pot/grow bag to stabilize your plant(s) in place.
  - a. **Best practices:** we recommend rubber mulch.
7. **Optional:** top with river rock, moss or other decorative plant finisher.

### **Inserting Pots:**

Internal shelves are available for some planters, speak with your customer service representative for your specific planter choices. Where available, shelves can be inserted in your planter on built-in support ledges. This enables easy placement, or replacement, of nursery and grow pots for discerning customers who love seasonal variety and change.

Want to dress it up further, use optional lightweight filler surrounding nursery pot once placed on ledge, and finish with decorative accessories like moss, or pea gravel.

\*The shelves are intended to hold nursery pots, not be directly planted into.

# Caring For Your Planter

---

Your planters are finished with an automotive paint that offers many advantages including UV resistance and can withstand extreme conditions. While our top coat paint used is very durable, storing planters in wet or steamy cartons or standing water can cause damage to the finish. Normal use allowing water to immediately drain off the finish after installation will not cause any harm.

## **Cleaning**

Our planters require very little maintenance to keep their beauty. All planters, regardless of glossy or matte finishes, can be cleaned with normal household cleaning products. We recommend dishwashing soap and avoiding the following: solutions that contain bleach, power washing, steel wool or other abrasives that may scratch your planter.

## **Polish**

Your fiberglass planter surface is comparable to a boat or car. On gloss finishes, polishing with an automotive or marine wax annually will enhance the look of your planter and will help protect the surface, especially in extreme weather climates. We do not recommend wax products on matte finishes unless specifically formulated.

## **Maintenance**

Mild scuff marks and scratches on glossy finishes can often be buffed out. We offer touch up paint kits for nicks and scratches.
