

The page is decorated with various green plant illustrations in the corners. Top-left: A large, detailed fern frond. Top-right: A branch with small, rounded, scale-like leaves. Bottom-left: A branch with small, rounded, scale-like leaves. Bottom-right: A branch with small, rounded, scale-like leaves. Center: The brand name [BYNATURE] in a large, thin, sans-serif font, with the 'N' in green. Below it, the tagline 'Enjoy. Breathe. Feel good.' in a smaller, green, sans-serif font. Below that, the title 'INSTALLATION GUIDE' in a bold, green, sans-serif font, and 'Faux plant ceilings' in a bold, green, sans-serif font.

[BYNATURE]

Enjoy. Breathe. Feel good.

INSTALLATION GUIDE

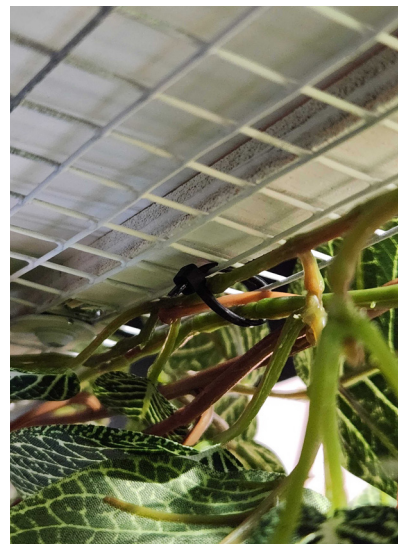

Faux plant ceilings

Installation steps

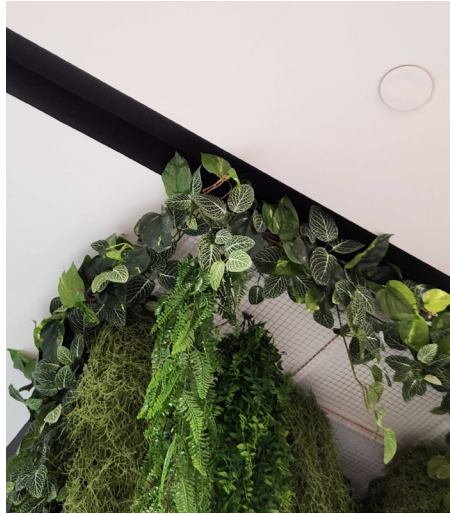

1. Cut all the stems of the faux plants to ensure they fit snugly against the ceiling.

2. Fasten the plants to the grid/support using nylon zip ties and snip the ends. Use additional zip ties to bring long strands of plants up to cover the grid laterally, instead of hanging down, to conceal the zip ties and structure. Hang plants both vertically and horizontally to achieve the desired look and cover any areas you don't like.

3. Once installed, manipulate the faux plants to fluff them out, ensuring they cover more area and look natural.

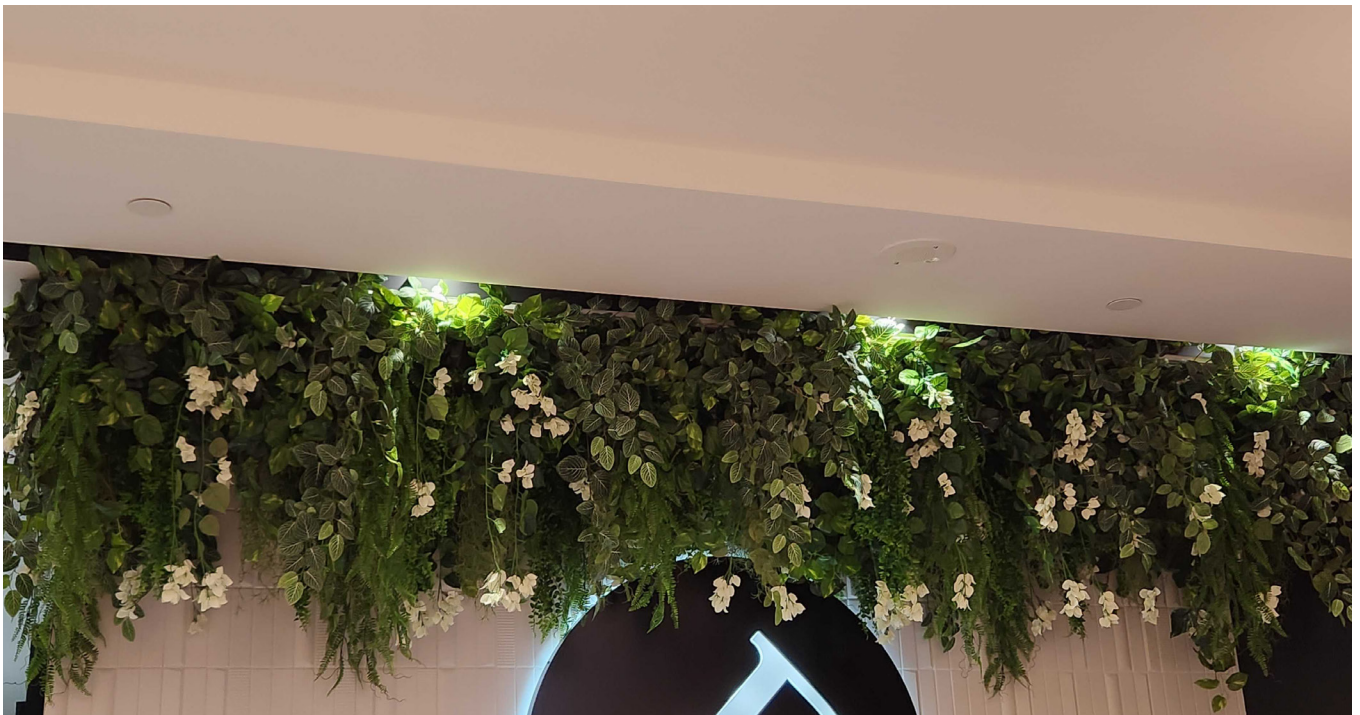

4. Don't hesitate to trim the ends of the plants to achieve the desired height of the feature or length of the strand.

Recommendation for layout

Mix the plant varieties through the feature to ensure a nice random look. You should also try to have various lengths of strands to keep the whole feature looking more natural.
